Beschlussprotokoll vom Mittwoch 25. Feb 15

Anwesend: IG, JS, JN, SZ, IK, TA
Ort: Unitobler

Infos:

n.a.

Diskussion:

- How is the interface between client and server specified?
  It is made of perl calls which return JSON, XML and DOT.
- What is our target?
  Create a REST API, which implements all existing API calls and return the same information. The returned values can be in a continuous way.

ToDo:

All: define the not yet existing API calls
SZ: digitalize user story cards
IG: send cards to Tara, for defining API calls
